

Hi fellow Trekkers - I have asked Dave if he would be good enough to let all of you know that because of some very recent and ongoing health issues we must put our 2005 Trek- 28RB2, which we have loved, up for sale. We hope to be able to continue to be back with you as an SOB.

I have not had a chance to put together anything very polished (pictures below & others I have had trouble attaching), but am showing below a listing that I have kept that outlines most of the features on our RV which was manufactured to meet our specific requirements and Diane says that I have added everything one can think of. I can tell you that our Trek has had been maintained to a very high standard and, if anyone is interested, you are welcome to talk with the mechanic who has done most of the work on it. Exterior in great shape, periodically hand waxed.

Please be aware that, in addition to the Trek, our Toad (well maintained 2001 Subaru Forester) with Roadmaster Sterling tow gear and SMI auxiliary braking can be part of the package.

Unfortunately, at this point we doubt that we will be able to stay at the Trek Rally, but our vehicles can be available there or in Clearwater to checkout for anyone interested.

Hopefully, we will at least have a chance to see some of you at the rally even if we do not fully participate.

We are asking \$45,000 for the Trek and \$48,000 for the Trek plus Subaru plus tow gear
